MEDICAL DEVICE and DIAGNOSTICS

The long road to launching a new medical device can be a lonely place. Fortunately, we know that road well.

From strategy development to regulatory approval, pricing, and reimbursement strategies, we know the challenges medical device companies face. We know the nuances specific to each device category, whether you're working in cardiovascular, orthopedic and spine, gastrointestinal, infectious disease, combination products, or general surgery.

MEDICAL DEVICE and DIAGNOSTICS

We look at everything

It's more than just trials. We'll think through everything you might need from the perspective of a team whose experience spans more than 185 projects in the past five years alone. You'll find us capable, reliable, and easy to work with, whether you're conducting a 10-patient feasibility study or a 10,000-patient post-marketing trial.

Medical device is a field of specialties, and our experts have worked on just about every type of product. And we're with you for the entire life cycle – the work isn't done until your device is established as a valued, trusted brand.

From benchtop to bedside

Our biotech and specialty device customers are behind some of the most remarkable innovations taking place today. We provide everything you need to get from proof of concept to regulatory approval, and we're right where you need us, strategically located in key regions to provide rapid access to patients, clinical sites, and specialized surgical centers.

Contact us today. We'll be happy to discuss any upcoming projects and start plotting the surest path to your destination

Our experience spans more than **185** projects in the past five years alone.

We know it's on your mind, so let's get it out there: We hate unnecessary risk. Our global teams make a big point of predictive planning, with a strong emphasis on risk prevention. Rather than take a "find it and fix it" approach, we provide up-to-date intelligence on changing FDA and EMA regulations, customized safety and vigilance management, data and safety monitoring, and risk-based monitoring.

IT'S WHAT WE DO. BEST.™
