

Functional Service Provider: You're Now Free to Do What You Do Best

FSPs offer many benefits. Key among them:

Scalability

Buy the service you need, and nothing more. Staff up for workload peaks without paying a full-time workforce you don't need during the valleys.

Cost savings

With no fixed costs, you pay only for what you need. And you save substantially on recruiting, training, managing internal staff, and myriad other expenses.

Flexibility

Clients maintain oversight and control at the level they choose. Some want to fully outsource, while others hire out a project at a time.

Do what you do best. Outsourcing non-core activities allows you to concentrate on what makes your company unique.

Success begets success and often leads to expansion in FSP relationships. Such was the case with the small biotech firm, which came to Premier Research for help with data management and programming. We soon became the company's entire data operations department.

An extension of your team

Whatever the size of the client and the extent of the engagement, Premier Research puts a premium on partnership. We become ingrained as an extension of the sponsor company's team, and heavy emphasis on communication means there are no misunderstandings and no surprises.

IT'S WHAT WE DO. BEST.™
